

UNIVERSITÀ  
DEGLI STUDI DI MILANO-BICOCCA

## SYLLABUS DEL CORSO

### Istologia

2223-1-I0301D003-I0301D009M

---

#### Aims

The student will learn: To know and describe the structure and ultrastructure of the eukaryotic cell and correlate the morphology to the function of each organelle. To know and describe the structure and morpho-functional characteristics of human tissues.

#### Contents

The course provides students with the fundamental theoretical knowledge of histology with a view to their subsequent professional application. The following concepts will be examined: the cell structure, the morphofunctional characteristics of tissues; the organization of the human body and its macroscopic and microscopic structure

#### Detailed program

Cytology: General properties of eukaryotic cells. Cell membrane. Cytosol, intracellular compartments, cytoplasmic organelles, nucleus and cytoskeleton.

Histology: Tissues: classification and methods of study. Epithelial tissue , Connective tissue. Adipose tissue. Cartilage. Bone. Smooth muscle, skeletal muscle, cardiac muscle. Nervous tissue. Blood. Tooth tissues.

#### Prerequisites

---

## **Teaching form**

Lectures and exercises.

Lessons in attendance, subject to any ministerial changes following the COVID pandemic situation

## **Textbook and teaching resource**

Sica G. et al.: ISTOLOGIA per le professioni sanitarie. Idelson Gnocchi

Adamo S. et al.: ISTOLOGIA per i corsi di laurea in professioni sanitarie. Piccin

Ten Cate. Istologia orale. Piccin

## **Semester**

First Semester

## **Assessment method**

Multiple choice test. 15 questions (4 answers of which one is correct): 5 cytology, 10 general histology

For each correct answer 2 scores will be assigned.

Oral exam on request.

Exams in attendance, subject to any ministerial changes following the COVID pandemic situation.

## **Office hours**

By appointment

## **Sustainable Development Goals**

GOOD HEALTH AND WELL-BEING
