

SYLLABUS DEL CORSO

Genetica Medica

2223-1-I0302D002-I0302D008M

Aims

The student will learn how :

- to recognize the mode of inheritance of Mendelian characters;
- is the structure of human chromosomes;
- are the mechanisms of mitosis and meiosis
- are the sources of genetic variation;
- are basic concepts of quantitative genetics and population genetics.

Contents

The topics of the course concern the basics of formal human genetics, introducing the student to the diagnostic and research approaches of hereditary diseases, including exercises on the probability associated with the inheritance of Mendelian genetic characters

Detailed program

- Mitosis and meiosis in relation to conventional cytogenetics.
- Mendelian genetics, extensions, recombination and linkage, genetic and physical maps.
- Mendelian Inheritance in man, pedigree reconstruction.
- Sex determination and X chromosome inactivation.
- Polymorphisms and mutations in the context of genetic variability.
- Basic principles of population and quantitative genetics.

Prerequisites

none

Teaching form

Lectures.

It is required 70% course attendance.

Textbook and teaching resource

Peter J. Russel *Genetica Fondamenti*

Supplementary material will be provided by teacher

Semester

First semester

Assessment method

Being an integrated course, the evaluation will cover all four modules.

Regarding the Medical Genetics module, the evaluation will consist of a written test that will be used to ascertain the level of knowledge and ability to understand the topics covered during the course and to be able to solve problems. The student will have to answer 10 quizzes (Multiple choice test) concerning the topics of Medical Genetics.

Oral examination will be required at professor's discretion (discussion of the written test). The oral test will serve to clarify critical issues emerged from the written test and to verify the communication skills of the student and will focus on the topics covered by the written test.

Office hours

On appointment by e-mail request
