SYLLABUS DEL CORSO

Environmental Justice and Geopolitics of The Sea

2223-1-F7502Q039

Aims

An understanding of the major challenges (acidification, oil and gas drilling, overfishing, and, in the long term, deep-sea mining, bioprospecting, and geo-engineering) posed by the deep seabed.

Understanding of the main questions raised by studying oceanic and transnational spaces in a critical geopolitics perspective.

An advanced ability to critically analyze and interrogate scholarship and discourse framing the oceans, and the geopolitical dynamics underway to conquer sea-power.

An engagement with the challenges of inter-disciplinary study and research.

Contents

The first part relates to the geopolitics of the deep sea and in particular it focuses on the definition, value, ownership, access, health and future state of the resource-rich and highly contested sub-surface ocean.

Then, after a short introduction to the most recent theoretical approaches to political geography and critical geopolitics, the course focuses first on the historical representation of the ocean as a "political and social space" and on how the sea can be framed by international geopolitical discourse, in relation to the processes of territorialisation, geo-power and extra-territoriality of marine spaces.

Detailed program

Marco Grasso

Part I – Geopolitics of deep oceans and environmental justice

The tragedy of the commons

Harvesting the Commons: the Oceanic frontier and the devolution of the seas

Deep oceans: potential and problems

Deep seabed governance: the United Nations Convention on the Law of Sea (UNCLOS) and the International Seabed Authority (ISA)

The deep seabed governance: the mining regime

Claiming the commons: Sovereignty and the deep seabed

Claiming the commons: the Arctic deep seabed

Protecting the commons

Climate change and the future of the deep oceans

Elena dell'Agnese

Part II - Political geography of the sea**

The political geography of the sea: a classical approach (maritime boundaries and Law of the Sea, transport and trade, strategy and warfare)

A (critical) political geo-graphy of the sea? thinking about the sea / representing the sea / exploiting the "geopolitical features" of the sea

Geo-graphy and the power of representation /Dividing (and naming) the ocean sea: the East Sea/ Sea of Japan issue

The territorialisation of the sea /Territorial claims and islands disputes: the Dokdo-Takeshima issue

Geographical definitions and island disputes: the Sankeku-Diaoyu issue/ climate change and vanishing islands/reefs: Okininotori: a shima, or a reef'?

A classical approach to the geopolitics of the sea/ the myth of sea power: A.T. Mahan theoretical positions / China as a maritime power and the South China Sea competition (Spratly, Paracel and more)

Sea power, sea nodes and islands as U.S. bases: The Hawai'i and Pearl Harbor, Midway and Wake, Guam

Sea power, sea nodes and islands as overseas U.S. bases/ bases of empire and lily pads: Guantanamo, Micronesia and Marshall Islands, Okinawa, Diego Garcia

LSMPAs (Large Scale Maritime Protected Areas): conservation or geopolitics?

Extra-territoriality and Cruise tourism as an example of globalization

Prerequisites

An adequate grasp of the perspectives of the relevant social sciences (geography, politics, economics, law, and sociology).

Capacity of working according to multidisciplinary and interdisciplinary perspectives.
