SYLLABUS DEL CORSO

Bank Management

2223-1-F1601M057

Learning objectives

The course provides students with knowledge aimed at understading the main issues of bank strategic management from the point of view of board and top management. The topics refer to the context of EU bank market after the recent non financial problematic events.

Part 1 describes the framework of risk supervision (Basel 2 and 3 rules) and other main regulatory issues, and examines the relationships with risk policies in banks. An analysis of governance models and internal control system in banking institutions is also provided. Two sections of the course are also focused on policies and business models in the banking industry, mainly on retail banking; mid-term strategies and strategic goals are examined by analyzing the structure and informationcontents of bank's strategic plan.

During the course workshops and case studies will be heldand discussed by bankes and practitioner in order to provide the industry's point of view on relevant issues. A section will be also dedicated to the analysis of liquidity risk and liquidity policies
