DEGLI STUDI DI MILANO-BICOCCA

## SYLLABUS DEL CORSO

### Laboratorio di Tecnica del Questionario

2223-1-F5106P007

---

#### Learning area

Fundamentals and research methods in social and economic psychology

#### Learning objectives

##### *Knowledge and understanding*

- Quantitative approach in the study of behaviors and attitudes
- Psychological processes involved in question answering

##### *Applying knowledge and understanding*

- Sample survey methods and theory
- Questionnaire design and development.

#### Contents

The course will focus on the design, drafting, application and use of a questionnaire. Theoretical and practical skills will be provided to manage the different operational phases and to identify the pros and cons of each methodological choice. The research examples will show the importance of the questionnaire in the psychological practice to measure and analyze psychosocial behaviors and constructs. The students, divided into groups, will carry out and administer their own questionnaire, starting from the design to the communication of the results.

## **Detailed program**

Definition and use of questionnaires in the psychological practice

Elaboration of the research objectives, and operationalization of the constructs to be investigated through a questionnaire

Designing a questionnaire: introduction, questions, and answers

Questions on behaviors and attitudes

Types of questions (e.g. open-ended, closed-ended) and rating scales

Questionnaire pretest

Coverage and recruitment of the sample

Methods of data collection

Online questionnaires: introduction to Qualtrics

From statistical data to research results

Results communication

## **Prerequisites**

Basic knowledge of research methodology

Knowledge of the difference between quantitative and qualitative research

Knowledge of descriptive statistics

## **Teaching methods**

Lectures, case studies, group exercises in the classroom and at home, presentation and discussion of the exercises.

## **Assessment methods**

Students must attend at least 70% of the lessons. Moreover, the completion of all the group tasks between one lesson and another (e.g. design of the questionnaire, administration, analysis of the results) is requested. The final examination consists of an oral presentation (that will be handled in small groups) of the work done during the course.
