

# UNIVERSITÀ DEGLI STUDI DI MILANO-BICOCCA

## **COURSE SYLLABUS**

## **Neuro-Functional Basis of Cognitive and Affective Processes**

2223-2-F5105P012-F5105P014M

## Learning area

Applied Experimental Psychological Sciences

## Learning objectives

Knowledge and understanding

- . Knowing the cognitive, neurobiological and functional bases of social and affective mental processes.
- . Understanding the genesis and dynamics of alterations and disorders of cognitive, communicative, emotional-motivational and social activity

Applying knowledge and understanding

- Acquisition of the ability to apply the acquired knowledge in order to design and carry out empirical studies in the field of social and affective neuroscience.
- Acquisition of the ability to apply the acquired knowledge in order to personally design and carry out clinical interventions focused on specific patients with socio-affective disorders.

#### **Contents**

This course provides essential knowledge concerning the main cognitive models and the neurophysiological bases of social and emotional-motivational processes in humans, in order to promote the understanding of socio-

emotional and behavioral functions, both in healthy people and patients with specific social or affective disorders.

## **Detailed program**

- 1. Perception of causality, biological motion and animacy
- 2. Mentalization
- 3. Face and gaze perception
- 4. Social attention and gaze following
- 5. Attentional biases towards social and emotional stimuli.
- 6. Embodied cognition
- 7. Neural bases of social cognition and self-referential processes
- 8. Default mode network
- 9. Conscience: free will and forensic neurosciences
- 10. Mirror neurons, empathy, intention understanding, Autism
- 11. Faces and gestures coding, the Affective and Emotional Brain
- 12. Sex differences in social cognition
- 13. Action Coding: Neuroscience of dance and movement
- 14. Audio-visuomotor neurons and multimodal coding
- 15. Neuroscience of music and Neuroaesthetics

## **Prerequisites**

This course requires a basic knowledge of anatomy and physiology of the nervous system and its cognitive functions.

The understanding of textbook and scientific article in English.

### **Teaching methods**

Frontal lessons with slides and audio/video presentations. Presentation and discussion of ongoing data and research articles.

## **Assessment methods**

Written exam with an oral interview on demand (either by the student or by the lecturers).

The written examination consists of open questions (essays) on textbooks and handouts of the lectures.

The oral colloquium is an in-depth interview on the topics covered in class.

### **Textbooks and Reading Materials**

From the handbook (online & open access) "Social and Affective Neuroscience of Everyday Human Interaction - From Theory to Methodology", Springer Nature, Boggio et al. (2022).

Part 2. Social Neuroscience and Moral Emotions

Chapter 5. AM Proverbio, A Zani Mirror neurons in actions...ERP and neuroimaging evidences

Chapter 6: AM Proverbio Sex differences in social cognition

Part 4. Methods used in Social and Affective Neuroscience

Chapter 12: AM Proverbio EEG and ERPs in the study of Language and Social Knowledge

2. Gazzaniga M.S., Ivry R.B., & Mangun G.R. (2019). Cognitive Neuroscience. New York: Norton (ONLY Chapters 13 & 14).

Scientific papers/chapters will be provided during the course and uploaded on the appropriate E-learning web page.

## **Sustainable Development Goals**

GOOD HEALTH AND WELL-BEING | GENDER EQUALITY
