

## COURSE SYLLABUS

### Medical Statistics

2223-1-I0102D003-I0102D010M

---

#### Aims

The course aims to provide students with the main elements of descriptive statistics.

#### Contents

Methods for data description.

#### Detailed program

MEDICAL STATISTICS - Quantitative-qualitative variables. Series in statistics. Graphical representation of a distribution. Position index of a distribution. Index of dispersion of a distribution. Scatter diagrams. Index of association between two quantitative values. Reliability of a measure, random and systematic errors. Index of precision and accuracy. Definition of Gaussian density. Approximation of a histogram using the Gaussian distribution. Definition of standardized Gaussian density and uses. Basic concepts of regression and correlation.

#### Prerequisites

#### Teaching form

Lectures and exercises.

## **Textbook and teaching resource**

Textbook and teaching resource  
Fowler J., Jarvis P., Chevannes M. (2006) Statistica per le professioni sanitarie, EdiSES;

## **Semester**

first year- first semester

## **Assessment method**

Written examination: test with multiple choice and open ended questions.

## **Office hours**

on request by email

## **Sustainable Development Goals**

GOOD HEALTH AND WELL-BEING | QUALITY EDUCATION | GENDER EQUALITY
