## COURSE SYLLABUS

### Sociology

2223-1-I0102D007-I0102D022M

---

#### Aims

Sociology

These Lectures aim to introduce students to the comprehension of some basic processes by which everyday life takes place. Society is an 'artificial' entity coming from conventions, routines and behavior patterns; it deals with the 'reality' of life day by day. So, this explains why we are interested in focusing on the dimension of everydayness. Finally, the lectures end with a special consideration of the relation between social inequalities and people's health.

#### Contents

History of sociology  
Perspectives on sociology  
Health and everyday life  
Health inequalities

#### Detailed program

#### Prerequisites

No particular prerequisite

## **Teaching form**

Lectures, text discussions, audio\video materials
