

COURSE SYLLABUS

Childbirth Complications

2223-3-I0102D904-I0102D916M

Aims

At the end of the course the student will have the knowledge related to the diagnosis of dystocia and the ability to identify the pathological characteristics related to labor in childbirth; the course also will provide the skills to give assistance in case of distocya or complicated labour.

Contents

The aim of the course is to allow the students to recognise the patologic situation and to act appropriately. The student will be able to know the psicological changes associated to the pregnancy and birth and the various aspects related to becoming a mother.

Detailed program

Through the midwifery Partnership model of care, the midwifery managment and the midwifery assessment scales, the student will learn clinical competences to assist women with an intrapartum medium-high obstetric risk profile. Midwifery care in case of complicated I-II-III-IV stage of labour related to dinamic or mechanic distocies. Pre-intra and postoperatoring care during cesarian section. Perinatal palliative care.

Prerequisites

None.
