UNIVERSITÀ
DEGLI STUDI DI MILANO-BICOCCA

SYLLABUS DEL CORSO

Il Servizio Sociale Internazionale

2223-1-F8701N077

Learning objectives

To know the process of social work identity construction at the international level
To critically reflect on the role of social work within different welfare systems
To situate the concepts of globalization, sustainable development and human rights in relation to social work
To critically argue and take position on global social issues
To acquire methods and tools useful to develop awareness of and taking a stand on global social issues that challenge social work practice at local and global levels

Contents

Critical social work in an international perspective
The international social work identity
Welfare system models and the role of social work
Social work in an international perspective: global awareness and globalization
Advocacy and policy practice in social work

Detailed program

Prerequisites

La conoscenza delle teorie, dei principi etici e delle tecniche del servizio sociale

Teaching methods

The lessons alternate discussions of theoretical concepts and with the analysis og projects, experiences and case studies from the field.

Attending students will be involved in a project work to develop social advocacy skills

Lessons will host contribution of scholars and experts at the European and international level.

Assessment methods

Written paper for attendinf studentes (see details in the "assignment" file uploaded on the E-learnig Platform)

Written exam for non attending students (three open ended questions)
