## SYLLABUS DEL CORSO

### Diritto dei Servizi di Pubblica Utilità

2223-1-F6302N028

---

#### Learning objectives

##### *Knowledge and understanding*

The course aims to offer a good knowledge of the legal framework for public utility services, with specific reference to the fundamental concepts of organization and management of services

##### *Applying knowledge and understanding*

The aims of the course are to develop methods of legal analysis of the public utility sectors, and also to design and manage service activities in the knowledge of the legal constraints in force.

#### Contents

The course aims to develop the analysis of the regime of public utility services, within the framework of European and internal regulations (with comparative references), with specific attention to the discipline of infrastructures and networks. From the managerial point of view, the following are analyzed: the legal constraints attributable to the public property of the companies; the local dimension of services; the different forms of management; the need to apply the rules on public contracts; public ownership of the assets and the proceduralisation of certain decisions. Finally, the aim is to develop issues relating to the quality of services and user protection.
