COURSE SYLLABUS

Psychology of Disability and Integration

2223-3-E1901R082

Course title

Psychology of Disability and integration

Topics and course structure

The Psychology of Disability and integration course is focused on the topics of disability and integration from a theoretical and methodological point of view. In detail, the following issues will be discussed: Definitions of disability and developmental disorders, general frameworks for assessing disabilities, skills, and knowledge for professional educators, social aspects and contextual factors, specific areas of disabilities (sensory - hearing and visual - and motor disabilities, learning impairments -, dyslexia, dysorthography, dyscalculia - and learning difficulties at school age, the attention deficit and hyperactivity disorder -ADHD-, autism syndrome)

Objectives

At the end of the course, the student will be able: - to understand the conceptual evolution of the concept of disability - to be informed about developmental disorders from early childhood to school age - to valorize the emphasis of a multi-dimensional perspective of development which highlight the interactional aspects of genetic and bio-psycho-social features - to be aware of interventions that can be used in educational practice.

Methodologies

Asynchronous lectures, live synchronous lectures (based on platform Webex), other didactic video materials and interview with experts from the field.
