COURSE SYLLABUS

Accounting and Financial Analysis - 2 (blended)

2223-2-E1803M049-T2

Learning objectives

This course is designed to introduce students to the basic concepts underlying financial accounting systems. The course emphasizes the measurement concepts and bookkeeping of business transactions for the construction of the basic financial accounting statements - the income statement, balance sheet, and cash flow statement - as well as their interpretation for management decisions. The course also provides an overview of the financial statements of banks.

The student will be able to record the business transactions and to proceed with the preparation of financial statements, as required by the implementation of the new legislation and accounting standards. The student will be able to properly interpret the operating performance and the financial condition of the company.
