

## SYLLABUS DEL CORSO

### Laboratorio: colloquio: metodi e Casi Clinici Esemplicativi - Turno A

2223-3-E2401P124-TA

---

#### Learning area

4: Knowledge about qualitative and quantitative research methodology

#### Learning objectives

##### *Knowledge and understanding*

- General topics and methodological approaches related to psychological diagnosis
- Clinical reasoning
- Data organisation

##### *Applying knowledge and understanding*

- The different contexts in which a clinical interview is used
- Ability to extrapolate data and formulate hypotheses by reading/listening to patient protocols
- Writing a report

#### Contents

The laboratory will begin with a brief introduction of the topic of how to give an interview, with different frameworks. Then we'll focus on the clinical interview, referring to real clinical cases presented by video, that will be also discussed in small groups.

## **Detailed program**

- Theory and practice of a clinical interview
- Clinical interview models
- Potential obstacles and how to overcome them

## **Prerequisites**

Nothing specific.

## **Teaching methods**

Discussions, working groups, practical training, group discussion on real clinical cases presented by video.

## **Assessment methods**

In order to pass the laboratory students will have to attend the 75% of the lessons. Credits acquisition is related to an evaluation of some group activities carried out during the lessons.

## **Textbooks and Reading Materials**

Detailed information about the teaching material will be published on the e-learning page associated with the course.

## **Sustainable Development Goals**
