## SYLLABUS DEL CORSO

### Principles and applications of nano-biotechnologies

2223-116R-M2

---

#### **Titolo**

Principles and applications of nano-biotechnologies

#### **Docente(i)**

Profs. M. Colombo, R. Grandori, D. Prosperi, F. Gelain, D. Salerno

#### **Lingua**

English

#### **Breve descrizione**

The course consists of a series of lectures on different topics in nano-biotechnologies given by different experts in the field with a particular emphasis on the exploitation of nanostructured materials in different applications.

The following topics will be addressed:

- Synthesis and biofunctionalization of colloidal nanoparticles.
- Non-covalent interactions of proteins with nanoparticles.
- Nanostructured biomaterials for tissue regeneration.

- Protein-DNA interaction at single molecule level.
- Biomedical application of colloidal and biomimetic nanoparticles.

**CFU / Ore**

1 CFU/ 8 hours
