COURSE SYLLABUS

Preventive Dentistry

2324-2-H4601D010

Aims

The course consists of two modules, with the following aims:

PREVENTIVE AND COMMUNITY DENTISTRY
The course aims to provide students with the tools necessary to arrive at an effective prevention of caries and the main periodontal diseases.

SURGICAL PATHOLOGY AND CLINICAL PROPEDEUTICS
The course aims to provide the basic knowledge of general surgery and common surgical procedures in dental practice

Contents

PREVENTIVE AND COMMUNITY DENTISTRY
Trends in caries disease and relationships with individual, social and environmental characteristics. Evaluation of its incidence and prevalence. Levels and types of prevention. The main prevention strategies applicable to health protection from the point of view of prevention of caries and the onset of dysgnathias.

SURGICAL PATHOLOGY AND CLINICAL PROPEDEUTICS
Principles of technique in general surgery, preoperative patient assessment, fundamentals of cancer surgery, elective surgery and emergency surgery

Detailed program

The extended program is further detailed within the individual modules

Prerequisites

Teaching form

Lessons in attendance, subject to any ministerial changes following the COVID pandemic situation.
Lessons will be held in Italian.

Textbook and teaching resource

Provided by the teacher on web platform

Semester

First semester

Assessment method

A final test will be held at the end of the course, there will be no ongoing tests.

An oral examination is employed to test students' knowledge, through an interview based on the topics covered in in class.

The examination is intended to test students' knowledge acquired in the different modules of the course and the student's ability to apply them to clinical scenarios.

The student will be evaluated by the teachers of both modules.

Office hours

Mon-Fri, by appointment
