

UNIVERSITÀ
DEGLI STUDI DI MILANO-BICOCCA

SYLLABUS DEL CORSO

Biofisica

2324-1-H4101D252-H4101D019M

Aims

Electrostatics and electrodynamics: Electrical charges and electrical circuits.

Physics of radiation and biological effects of radiation.

Optics: mechanism of the human visual system.

Contents

The primary goal of the course is to provide students with the tools for the understanding of the complex reactions that represent the molecular basis of life, and with the fundamentals to identify the cause-effect relations of the most important chemical and physical processes for the curriculum and the work of a physician. This knowledge will form the primary basis for a rationale approach to the knowledge of medical sciences.

Detailed program

ELECTRODYNAMICS: - Interaction between electric charges. - Electrical field and electrostatic potential. - Distribution of electric charges: electric dipole and dipole layer. - Meaning of the dielectric constant. - The capacity of a capacitor. - Electrical circuits. - Laws of Ohm. - Concept of stationary current and of transient current. - Charge and discharge of a capacitor.

RADIATION PHYSICS: - Overview of the physics of the nucleus. - Radioactive decay. - Alpha, beta, gamma and nuclear reactions decay. - Emission and absorption of corpuscular and electromagnetic radiation. - X-ray. - Radiation-matter interaction. - Biological effects of radiation

OPTICS: - Spectrum of electromagnetic radiation. - Absorption of the radiation - Light and image formation - Lenses and geometrical optics - Construction of images according to geometrical optics - Eye as an optical system - Optical defects of the eye - Theory of the color perception

Prerequisites

Basic knowledges of mathematics and analysis.

Teaching form

Lectures and exercises.

Textbook and teaching resource

A. Alessandrini, "Fisica per le scienze della vita", CEA; ISBN-13: 978-8808920454

Semester

First semester

Assessment method

Online exam: Multiple choice exercises (numerical exercises that require the application of several physical principles). Oral test on teacher evaluation.

Office hours

By telephone appointment (02 6448 8209) or by email (francesco.mantegazza@unimib.it).

Sustainable Development Goals

GOOD HEALTH AND WELL-BEING
