

UNIVERSITÀ
DEGLI STUDI DI MILANO-BICOCCA

COURSE SYLLABUS

Internship in Pharmacology Research

2324-4-H4101D100

Aims

Training and experimental activities in presence at the Pharmacology Laboratories.

The aim is to promote practical knowledge and how basic research is carried out for study the molecular mechanisms underlying pathologies and to see effects of possible treatments.

Contents

the student will attend the Pharmacology laboratory for 50 hours and will critically analyze the ongoing projects and the methods used through the analysis and reading of scientific articles.

Detailed program

The program will be established on ongoing projects and it includes the evaluation of the effects of substances with pharmacological activity in different disease models.

Prerequisites

Knowledge from the pharmacology course.

Teaching form

Training activity in the laboratory.

Textbook and teaching resource

Scientific literature articles and experimental protocols.

Semester

During academic year

Assessment method

Attendance in the laboratory and short report at the end of the activity carried out.

Office hours

by appointment
