COURSE SYLLABUS

Philosophy of Human Rights and Pluralism

2324-4-A5810254

Learning objectives

The course offers the opportunity of deepening the variety of legal-philosophical dimensions of human rights with reference to selected areas of reflection, in particular environmental ethics and ethics of new technologies.
Students will have the opportunity to reflect on the challenges posed by enviornmental and climate change questions as well as by technological innovation to the framework of fundamental rights and to legal-philosophical categories.
Students will develop *critical thinking* through the analysis and reconceptualization of traditional legal and ethical categories in order to make them fit for the current challenges.

Contents

The course deals with the ethical-legal questions arisen by environmental issues and technological innovation. In particular, new legal proposals will be analysed within the value-laden framework of fundamental rights to address the challenges of digitalization of society and of ecological transition.

Detailed program
