DEGLI STUDI DI MILANO-BICOCCA

## SYLLABUS DEL CORSO

### Istituzioni di Matematica II

2324-2-E3002Q002

---

#### Aims

The course aims at accomplishment of the topics treated and ability to solve problems and to apply the learned methods in different contexts.

#### Contents

Sequences and series. Linear algebra. Differential calculus in several variables. Curves and surfaces. Line integrals. Integral calculus in several variables.

#### Detailed program

1. Sequences and Series. Numerical sequences, numerical series, geometric series, convergence tests for series. Power series, Taylor and Maclaurin series.
2. Linear algebra. The linear spaces  $R^2$  and  $R^3$ . Planes and lines in 3-space. Systems of linear equations. Matrices e determinants.
3. Differential calculus in several variables. Limits and continuity. Partial and directional derivatives, differentiable functions. Higher order derivatives. Extreme values and classification of critical points.
4. Curves in 3-space. Length of (smooth) curves, line integrals.
5. Integral calculus in several variables. Double integrals over rectangles and more general regions.

Evaluation of double integrals by repeated one-dimensional integration. Triple integrals on rectangular boxes and on more general regions. Fubini-Tonelli theorem for triple integrals. Change of variables in multiple integrals: polar coordinates, cylindrical coordinates and spherical coordinates.

## **Prerequisites**

First year math course.

## **Teaching form**

Lessons (40 h - 5 CFU), exercise classes (36 h - 3 CFU).

The course is in italian

## **Textbook and teaching resource**

Textbook:

- J. Stewart, Calcolo. Funzioni di più variabili, Apogeo.

Other books (ebook present in the library)

- V.Barutello, M.Conti, D.L.Ferrario, S.Terracini, G.Verzini, Analisi Matematica Volume 2, Zanichelli

## **Semester**

Second year first semester

## **Assessment method**

Written examination (18-30/30).

The written test consists of some exercises questions concerning the course contents.

The possible oral examination consists of comments and questions on the errors of the written part.  
The oral examination will be held on teacher or student request.

## **Office hours**

By appointment scheduled through email: [michele.rossi@unimib.it](mailto:michele.rossi@unimib.it)

## **Sustainable Development Goals**

QUALITY EDUCATION
