

## COURSE SYLLABUS

### Rehabilitative Approach To Pain

2324-3-I0201D143-I0201D223M

---

#### Aims

- to recognize the different pain types and mechanisms
- to understand the principles underpinning exercise physiology IASP guidelines in musculoskeletal assessment
- to understand the principles underpinning exercise physiology

#### Contents

- different pain types according to IASP definition
- different pain mechanisms according to IASP definition
- integration of clinical sensory testing in musculoskeletal assessment
  - implications for rehabilitation
- strength training programming

#### Detailed program

- assessment and management in musculoskeletal rehabilitation

- quantitative and clinical sensory tests in rehabilitation
- principles of exercise physiology and integration of strength training in rehabilitation
- stratified model of care

## **Prerequisites**

## **Teaching form**

Lessons in attendance, clinical case discussion, small group work, subject to any changes following the pandemic.

## **Textbook and teaching resource**

Beales D, Mitchell T, Moloney N, Rabey M, Ng W, Rebbeck T. Masterclass: A pragmatic approach to pain sensitivity in people with musculoskeletal disorders and implications for clinical management for musculoskeletal clinicians. *Musculoskelet Sci Pract.* 2021 Feb;51:102221. doi: 10.1016/j.msksp.2020.102221. Epub 2020 Jul 18. PMID: 32972875.
