COURSE SYLLABUS

Training in Mri Diagnostic Techniques in Neuroradiology

2324-2-I0303D009-I0303D058M

Aims

Nuclear Magnetic Resonance in Neuroradiology: the reception of the patient, the collection of his medical data and information for Nuclear Magnetic Resonance examination in Neuroradiology; absolute and relative contraindications for the Nuclear Magnetic Resonance examination; the correct positioning of the patient, the examination settings: coils, sequences, the execution of the examination; the processing and archiving of images.

Contents

By the end of the second year of training, the students will be able to conduct Nuclear Magnetic Resonance diagnostic investigations in Neuroradiology, knowing the functioning of equipments and the procedures for processing and archiving of produced images.

The students will also be able to respect and apply the standards of radioprotection for patients and workers.

Detailed program

Prerequisites

Teaching form

Traineeship

Textbook and teaching resource

Semester

Second semester

Assessment method

Oral examination

Office hours

By appointment required by mail

Sustainable Development Goals

GOOD HEALTH AND WELL-BEING
