

UNIVERSITÀ  
DEGLI STUDI DI MILANO-BICOCCA

## SYLLABUS DEL CORSO

### Journal Club di Medicina di Laboratorio 2

2324-3-I0302D041

---

#### Aims

Knowledge of improvements in the Laboratory Medicine research field, regarding methodologies and clinical applications  
understanding and using the main resources for bibliography and scientific literature

#### Contents

To provide the students with most significant innovation in laboratory medicine  
Study focused on scientific literature.

#### Detailed program

New methodologies, techniques, tools and applications in laboratory medicine.

- general difference between scientific papers, reviews, letters
- difference between scientific journals (Impact factor and content organization)
- scientific paper sections: abstract, methods, results, discussion
- how to insert bibliography in different scientific products ( papers, thesis, fellowships)

#### Prerequisites

2nd year degree Biomedical Laboratory Technician

### **Teaching form**

Seminars

### **Textbook and teaching resource**

The Teacher will provide educational materials

### **Semester**

Second semester

### **Assessment method**

Attendance

### **Office hours**

By appointment required by mail.

### **Sustainable Development Goals**

GOOD HEALTH AND WELL-BEING
