COURSE SYLLABUS

Training IIa

2324-2-I0302D045-I0302D061M

Aims

- To know how to use the LIS (Laboratory Information System).
- To know how to perform calibration procedures.
- To know how to execute analysis.
- To know how to perform Quality control. To know how to perform ordinary service of the instruments.

Contents

The goal of the course is to provide the student with the practical skills regarding the optimal use of computer resources, the proper execution of laboratory analysis, the correct calibration and service of the Instruments and the quality control.

Detailed program

- The use of LIS (Laboratory Information System).
- Calibration procedures.
- Analysis execution.
- Quality control management.
- Ordinary service of the instruments.

Prerequisites

Teaching form

Traineeship

Textbook and teaching resource

The Teachers will provide educational materials

Semester

First and second semester second year

Assessment method

The student prepares a written report

The tutor fill in a specific form

The final evaluation is given during an oral examination

Office hours

By appointment

Sustainable Development Goals

GOOD HEALTH AND WELL-BEING
