COURSE SYLLABUS

Surgical Specialty Nursing

2324-2-I0101D012

Aims

At the end of the course, the student will be able to plan nursing care for the person undergoing surgery in selected specialised surgical fields, identifying nursing priorities and contextualising the interventions.
The specialist surgical fields identified are:

- Thoracic surgery
- Gynaecology
- Cardiac Surgery
- Vascular surgery
- Abdominal surgery
- Urology
- Neurosurgery
- Otolaryngology
- Bariatric surgery
- Maxillofacial surgery
- Vulnology (surgical approach)

The student will also be able to understand the meaning and purpose of nursing research, describe and justify the role of the nurse as a contributor and user of nursing research within the scientific community to which he/she belongs.

Contents

The course aims to give elements to provide nursing to patients undergoing to surgical interventions in different fields: Thoracic, Gynecological, Heart, Vascular, Abdominal Surgery, Urology, Neurosurgery, Otorhinolaryngology, Bariatric Surgery, Vulnology, Maxillo-facial surgery

It also provides the theoretical basics for the research in a scientific field by consulting biomedical literature.

Detailed program

See Syllabus of the Course Modules

Prerequisites

Defined by the academic regulations.

Teaching form

See Syllabus of the Course Modules

Textbook and teaching resource

See Syllabus of the Course Modules

Semester

2nd Year, 2nd Semester

Assessment method

The final examination consists of two parts:
-- Written examination on topics covered in the lecture and in-depth study not covered in the lecture, covering the syllabus of the Course modules:
** 28 closed questions (multiple choice),
* 20 of General Surgery 2
* 8 of Nursing Research Methodology
** 4 open questions
* 2 of General Surgery 2
* 2 of Nursing Research Methodology

Oral test (interview on topics covered in the lecture and in-depth study not covered in the lecture) covering the programme of the module Nursing in Specialist Surgery

Office hours

On appointment
