SYLLABUS DEL CORSO

Emergenze Ostetrico-Ginecologiche e Neonatali

2324-3-I0102D905

Aims

Recognise the signs of emergency-urgency situations in obstetrics, gynaecology, neonatal and understand their management and evolution.

Understanding anaesthesiological and resuscitative practices applied to obstetrics, gynaecology and neonatology. The course provides skills for evidence-based midwifery care in Emergency-Urgency, in which the student will be able to implement the care of the woman and the newborn through the Midwifery Partnership, Midwifery Management, ICF classification and the Rating Scales.

Contents

- Clinical, diagnosis and treatment of obstetrical-gynaecological and neonatal emergencies.
- Care of women with a diagnostic and therapeutic care pathway in obstetrical-gynaecological emergency-urgency conditions.
- Care (diagnostic and therapeutic) of the newborn in emergency-urgency conditions.
- Principles of general and locoregional anaesthesia applied to gynaecology and obstetrics
- Principles of maternal-infant cardiopulmonary resuscitation
- Effects and/or complications of drugs on mother, foetus and infant
- Communication skills necessary for the management of emergency-urgency situations

Detailed program

The detailed program can be found in the Syllabus of the individual modules that compose up the course

Prerequisites

None.

Teaching form

Lessons, trainings.

Textbook and teaching resource

The bibliography can be found in the Syllabus of the individual modules that make up the course. The teaching materials used (slides, work tracks, scientific articles) will be uploaded on the e-learning pages dedicated to the individual modules.

Semester

I semester.

Assessment method

The detailed assessment methods can be found in the Syllabus of the individual modules that constitute the course.

Office hours

On appointment.
