# **COURSE SYLLABUS**

## **Data Science M**

2324-2-F8204B018

## Learning objectives

Data Science M is composed by two modules

#### **Data Mining M**

The course aims to provide data analysis and data mining tecniques and to improve predictive modelling skills by using the R software environment for statistical computing.

For more details, please see: https://elearning.unimib.it/course/info.php?id=51202

#### Statistical Learning M

The course aims to acquire the main techniques of statistical learning (SL) and their implementation in the R programming environment. During the course, emphasis will be placed on the algorithmic modelling culture, while also paying attention to the estimation of uncertainty in predictions.

For more details, please see: https://elearning.unimib.it/course/info.php?id=51210
