## SYLLABUS DEL CORSO

## **Bank Management**

2324-1-F1601M057

## Learning objectives

The course provides students with knowledge aimed at understading the main issues of bank strategic management from the point of view of the board and of the top management. The topics refer to the context of EU bank market after the recent non financial problematic events.

Part 1 describes the framework of risk supervision (Basel 2 and 3 rules) and points out the most relevant regulatory issues. The connections with risk policies in banks are also examines. An analysis of governance models and internal control system in banking institutions is provided in Part 2. Finally, two further sections of the course focus on policies and business models in the banking industry, mainly looking to the retail banking; mid-term strategies and strategic goals are examined by analyzing the structure and information provided by a bank's strategic plan.

During the course workshops and case studies will be heldand discussed by bankes and practitioner in order to provide the industry's point of view on relevant issues. A section will be also dedicated to the analysis of liquidity risk and liquidity policies
