SYLLABUS DEL CORSO

Business Plan and Innovation

2324-2-F7701M122

Learning objectives

During the course, the student will have the opportunity to learn the procedure for drawing up a business plan for an innovative company. The course will consist of a theoretical part, where the methods of drafting a business plan will be presented and a part of the exercise, where the drafting techniques of the business plan will be used and applied to an innovative start-up. It will also be analyzed and implemented the new approach method called "lean start-up".

In addition to budget analysis, the course will also include the application of notions of statistics and corporate finance that will be resumed during the lessons. With reference to statistics, processes will be used that require knowledge of variance analysis, correlation and regression. As regards corporate finance, knowledge of the CAPM (Capital Asset Pricing Model) will be required.
