COURSE SYLLABUS

Planning and Project Management

2324-2-F8701N039

Learning objectives

Social project management knowledge development with regard to the PCM model – Project Cycle Management- and its main tools .

Project management skills development based on rethought and modeled learnings from application experience of welfare projects, with regard to the psychosociological approach

Contents

Organization, services and project : relationship and connection

The problem setting to start designing

The Project Cycle management phases

Insights :

· context social mapping

· target description and the social groups

· offering development- detailed objectives and actions

· the partnership networking

· digital and technology approach

· process monitoring and project management dashboard

· impact evaluation: the outcomes and the measures

· principles of social innovation

Detailed program

The course proposes students to address the theme of social design both from a cognitive point of view of models and concepts, as well as from an application and exercise point of view. In this regard, reworked and modelled learnings from experiences of funded and successful projects will be made available, in the form of lectures, texts with examples and direct testimony from people with key roles in design settings. This is intended to provide supplementary instrumentation and opportunities for discussion for a full acquisition of expendable skills in the field.

Prerequisites

Social work experience and training on the job is appreciated, also voluntary experience

Teaching methods

Lessons

Work in subgroups, organized and planned

Testimony from design setting

Individual project work to be delivered by email or to be placed in the shared folder in Drive.

Assessment methods

A written individual project work will be required, if positively assessed it will allow admission to the oral interview

Textbooks and Reading Materials

Barberis D, Elisio R, Giorgi M, Cremascoli A, "*Le trasformazioni di un'esperienza di welfare ri-generativo: manuale inusuale di progettazione sociale"*, Editore Do IT Human - ebook in corso di pubblicazione .

Barus- Michel J., Enriquez E., Levy A., a cura di (2010) *Dizionario di Psicosociol*ogia – voci progetto, organizzazione , soggetto; Cortina Raffaello Editore , Milano
