- Medicine in history: from the biological model to the bio-psycho-social model
- Medical ethics and bioethics
- Stress and coping strategies: the perspective of the health workers, of the patient and of the caregiver
- Illness and disease during the different life stages
- The impact that the disease and the different phases of a diagnostic process have on the patient and on his/her relatives
- The impact that the disease and the different phases of the diagnostic process have on the physician
- Relationship and communication between physician and patient
- Culture and psychopathology
- Evaluation and care
- Development and transculturality
- Introduction to the Jung's thought

Prerequisites

Nothing specific. A good knowledge of clinical psychology foundations would allow a deeper understanding of the themes discussed.

Teaching methods

Lectures, discussion of case studies; some documentaries and movies will also be presented and discussed, with the aim of analyzing in depth some issues and of reinforcing the student’s interest for the topic.

Students’ active participation is solicited in order to stimulate analytical and expository skills; therefore, interested students may write a short essay, by themselves cooperating with a a fellow student, and produce a Powerpoint presentation to be discussed with the class. Participation to optional activities contributes to final evaluation.

Assessment methods

A written test including multiple choice questions and two open questions. Questions concern the whole program and also papers published on e-learning

The open question consists in the discussion and analysis of a specific and is aimed to the evaluation of analytical

skills and of the ability to discuss critically the subject.

All the material published on e-learning must be studied

Oral examination is optional and is available only if the written test has been passed.

There will be pre-winter session

Although this course is held in Italian, for Erasmus students, course material can also be available in English, and students can take the exam in English if they wish to do so
