Contents

The course provides a complete overview of the main topics of Consumer Psychology and integrates theoretical contributions with case histories from main brands and companies.

Detailed program

The course is divided in three parts.

The first one is about theoretical and scientific models for the understanding of the consumer as an individual, and focuses on decision making, perception, and learning.

The second part is concerned with motivation, attitudes, identity construction in relation with products consumption and brands, the role of the socio-cultural context, the social group and advertising.

The third part explores fields of application such as 'information communication technologies for consumer research and strategy, food consumption, marketing of experience, social media strategy and analytics, UX and CX research.

Prerequisites

No one in particular

Teaching methods

Besides traditional lectures, learning is fostered by group exercises and e-learning based tests.

Exercises are aimed at developing reasoning skills, problem solving e the application of theory to real cases.

Assessment methods

Assessment is an oral evaluation of knowledge and understanding of the course contents presented in the course textbook and in the handouts of the lectures.

Textbooks and Reading Materials

The bibliography will be provided at the beginning of the course and published in the course web-site.
