Written test

MODE 1 - PROJECT+BUSINESS GAME

Those who choose mode 1 attend the lessons by preparing the analysis of the case connected to each thematic study in a group.

Analysis of the case connected to a thematic study. The aim of the activity is the deepening of a topic covered in the course starting from the experience of a company. The analysis of the case requires students to collect information on the following points:

- 1) The fundamental characteristics of the company and/or the sector/s in which it operates;
 - a) Brief history
 - b) Company mission and vision
 - c) Scope of activity and positioning in the reference sector
- 2) The topic under discussion (associated with the case);
 - a) What choices has the company made?
 - b) For what reasons did he do them?
 - c) What are the main benefits and costs associated with the strategic choice made?
 - d) Which elements of the path undertaken by the company can be considered best practices?
- 3) Rationalization of best practices and key learnings.

The analysis carried out will be presented in the classroom to all colleagues by building a real presentation. In addition to the case, it will be possible to use the chapter of the textbook that deals with the theme connected to the case as a theoretical starting point.

Students will have to create a group and communicate their preferences regarding the topics. The assignment of the cases/themes to the groups will be carried out by the teacher of the course within the week following the beginning of the course.

The result of the group work will be a written report (maximum 15 pages plus attachments, 12 fonts, line spacing 1.5), a powerpoint presentation to be used in the classroom during the two days dedicated to presentations (30 minutes per presentation + 10 minutes of questions) and a short 3-minute video to summarize the main messages that emerge from the analysis work carried out (knowledge pills). The class will cast a vote for the best presentation and video which will each receive an additional score.

Business game. Course participants will have to manage the growth process of a simulated company by participating in a business game.

The vote for the project and the business game are valid until the last exam session scheduled for the 2023-2024 academic year (September exam session).

Students will be evaluated with reference to the following criteria: Business Game 40 points, Case/theme analysis 40 points, Quiz (Individual exam) 10 points, Peer to Peer Evaluation 10 points.

MODE 2 - INDIVIDUAL WORK

Students who choose not to attend classes and not to participate in group activities illustrated in MODE 1 can choose MODE 2. According to this mode, students must prepare for the exam on the readings indicated in the following section.

Individual written exam: It will consist of 4-6 open questions on the two books indicated in the following section.
