COURSE SYLLABUS

Organization Design and Management

2324-2-E2001R010

Course title

BUSINESS ORGANIZATION AND MARKETING

Topics and course structure

The course explores managing communication processes in companies and institutions, with an analysis of their contexts in action.
To develop skills of interpretation of different contexts, the Business Organization and Marketing course addresses the knowledge of organizations and tools and policies of organizational communication.
Strategic choices, organizational dynamics and marketing mix tools are addressed during the course

Objectives

Knowledge and understanding

Students will acquire solid and systematic knowledge on the use of tools and communication processes in organizations, and in particular marketing communication and internal communication.

Ability to apply knowledge and understanding

Students will learn to use concepts described above by applying them in the study of business cases and in exercices

Methodologies

Lectures, cases and exercises, keynote speeches

Online and offline teaching materials

Case studies, videos, slides
