

UNIVERSITÀ
DEGLI STUDI DI MILANO-BICOCCA

COURSE SYLLABUS

Neural Symbolic Computation

2324-114R008

Title

Neural Symbolic Computation

Teacher(s)

Guido Fiorino
Rafael Peñaloza
Italo Zoppis

Language

English

Short description

The aim of the course is to present the field of neuro-symbolic integration, also known as Neural-Symbolic Learning and Reasoning.

As far as possible we try to keep the course self-contained, in particular for the logical notions necessary to understand the approach.

Tentative programme:

- Non-monotonic reasoning and ASP;
- Fuzzy and Real Logics;
- Inserting and extracting knowledge from CLIP System;
- Logic Tensor Networks and, if possible, Logical Neural Networks;
- Computational Graphs.
