SYLLABUS DEL CORSO

Futuri digitali per il patrimonio immateriale - 8 ore

2324-108R-04

Title

Digital Perspectives for Intangible Heritage

Teacher(s)

Francesca Gasparini
Marco Cremaschi

Language

Italian

Short description

The course includes 4 blocks of lessons with themes related to the digitization of intangible cultural heritage, the management of saved information, through appropriate database models, and attention to the dissemination of the material through sites that comply with the main user interface (UI) indications and designed taking into account the user experience (UX) with particular attention to the theme of accessibility. The course will not only provide textual references and theoretical material, but it will indicate tools that can be easily used and available for free to concretely experience the topics proposed in the lessons.

Direct interaction is envisaged with the bodies involved in the doctorate in order to present concrete cases to which

the theoretical lessons refer.
