DEGLI STUDI DI MILANO-BICOCCA

SYLLABUS DEL CORSO

Il carcinoma renale studiato mediante modelli cellulari in vitro

2324-76R-RCC

Title

Renal Cell Carcinoma studied by in vitro cellular models

Teacher(s)

Cristina Bianchi

Language

italian/english

Short description

The course includes an initial description of the biological and molecular characteristics of renal cell carcinoma, in particular of the clear cell subtype (ccRCC), with specific attention to the pathogenetic, metabolic and invasive/metastatic aspects. Theoretical/practical issues relating to the setup, characterization and use of in vitro cellular models for the study of specific functional aspects of renal neoplastic cells with possible translational implications will then be explored in depth.

CFU / Hours

1 CFU/8 hours
