

UNIVERSITÀ DEGLI STUDI DI MILANO-BICOCCA

COURSE SYLLABUS

Brain immunology and immunotherapy of malignant gliomas

2324-76R-IMMUBRAIN

Title

Brain immunology and immunotherapy of malignant gliomas

Teacher(s)

Serena Pellegatta

Language

Italian/English

Short description

The objective of this course is to enhance understanding of the new paradigms of brain immunity and revisit the immune privilege concept to advance insights into crosstalk between immune components in health and disease, including brain tumors. Particular attention will be focused on immunosuppressive mediators and therapeutic targets in the tumor microenvironment of malignant gliomas. Ultimately, this knowledge could influence future screening and management of personalized cell therapies for patients affected by malignant gliomas.

CFU / Hours

1 CFU/8 hours
