

UNIVERSITÀ
DEGLI STUDI DI MILANO-BICOCCA

COURSE SYLLABUS

Neuromechanics of human movement

2324-122R-08

Title

Neuromechanics of human movement

Teacher(s)

Dr. Cristiano Alessandro

Language

English

Short description

Students will familiarize with the basic concepts of neuromechanics, understanding how the execution of voluntary movements results from the complex interplay between neural processes and biomechanical properties of the musculoskeletal system. This integrative approach to study the control of movement will be analyzed during the course through both frontal lessons and interactive discussions on relevant scientific papers.

CFU / Hours

1 CFU / 8 hours

Teaching period

09-11-16-18 July 2024
h. 2-4 pm, classroom U8-02
