COURSE SYLLABUS

Neuroinflammation

2324-122R-05

Title

Neuroinflammation

Teacher(s)

Maria Foti

Language

English

Short description

Innate and adaptive immunity play central roles in nervous system development, as well as in the pathogenesis of many neurological and psychiatric diseases. The understanding of the pathways involved not only provide targets for novel therapeutics but also new insights into fundamental mechanisms involved in normal brain function. Students taking this course will have the opportunities to study the impact of neuroinflammation in the pathophysiology of neurodegenerative and neuropsychiatric disorders.

CFU / Hours

1/8

Teaching period

II semester (September 2024: 10, 19, 25, 30)

Sustainable Development Goals

GOOD HEALTH AND WELL-BEING | QUALITY EDUCATION
