COURSE SYLLABUS

Geografia fisica in relazione all'umanizzazione terrestre (litosfera, idrosfera, atmosfera)

2324-A22-FIA22010

Title

Physical geography in relation to terrestrial humanisation (lithosphere, hydrosphere, atmosphere)

Teacher(s)

Language

Short description

The course explores the interactions between the Earth's natural physical processes and human activities and is divided into three main thematic sections:

1. Lithosphere: the foundations of habitation;
2. Hydrosphere: lymph and life energy;
3. Atmosphere: the breath of the world.

The course aims to provide a detailed understanding of the Earth's main physical processes and their interactions with human activities and to encourage the development of a critical and integrated view of the topics covered.
