DEGLI STUDI DI MILANO-BICOCCA

COURSE SYLLABUS

Contrastographic Planar Radiological Techniques

2425-1-I0303D006-I0303D025M

Aims

The course aims to provide students with theoretical and practical skills, and basic techniques to execute contrast X-rays investigations, using direct techniques.

Contents

The student will be required to demonstrate his/her knowledge of the contrastographic techniques and methodologies illustrated in class, with particular attention to the definition of the correctness criteria in carrying out a radiological examination. He/she must also have acquired the necessary skills regarding the definition of normality and pathology of the organs and anatomical structures treated during the course

Detailed program

Contrast media for planar radiological use
Contrastographic techniques in the study of the urinary and genital systems
Contrastographic techniques in the study of the gastrointestinal system

Prerequisites

Organs and Functions

Teaching form

4 lessons of 2 hours carried out in attendance in both frontal/interactive modality with practical activities for students

Textbook and teaching resource

F.MAZZUCATO: “Anatomia Radiologica. Tecniche e Metodologie in Radiodiagnostica” Ed.Piccin

Teacher will provide other educational material.

Semester

Second semester

Assessment method

Oral test to evaluate preparation on the teaching programme, the ability to organize knowledge in a short discussion and communication skills in a disciplinary context.

Office hours

By appointment required by mail

Sustainable Development Goals
