COURSE SYLLABUS

Patient Management

2425-1-I0303D005-I0303D019M

Aims

The student should be able to know and apply the fundamentals of personal care and management during investigations or treatments in the field of Diagnostic Imaging and/or Radiotherapy.

Contents

Aim of the teaching is to provide information about correct patient management during radiological investigations or treatments.

Detailed program

- ? The concept of privacy. Focus on healthcare and data management
- ? The prevention of healthcare-associated infections (HAI) focuses on universal precautions to be used during radiological investigations or treatments.
- ? Assistance and management of the person during the carrying out of investigations or treatments in the radiological field.
- ? The helping relationship and communication with assisted people: general principles. Reflections on communication with the aggressive person
- ? The mobilization and postures to be assumed by the person while carrying out investigations or treatments in the radiological field.
- ? Prevention of falls during radiological investigations or treatments.
- ? The recognition and detection of some vital parameters (consciousness, respiratory activity, circulatory activity)
- ? The measures to be used with the person in particular clinical situations (e.g. state of unconsciousness, presence of paresis or plegia, etc.)

? The measures to be used with the person who has medical devices (e.g. infusion therapy, oxygen therapy, indwelling bladder catheter, vascular access, etc.),
