COURSE SYLLABUS

Elements of Prosthesis

2425-2-I0301D031-I0301D036M

Aims

The Course, Elements of Dental Prosthetics, aims to provide the student of the Degree Course in Dental Hygiene with the basis for the knowledge of the various dental prostheses both on natural teeth and on dental implants.

Contents

The course provides the student with the knowledge of the different types of dental prostheses in general from the design to the realization of the prosthesis on natural teeth or implants. The lessons are held with frontal and interactive teaching methods accompanied by iconographic material.
The student will be asked to actively discuss the different types of prostheses.

Detailed program

Definition of Dental Prosthetics and types of Dental Prosthetics
General concepts on dental materials used for the construction of prostheses
General concepts of Fixed Prosthetics on natural teeth and implants
General concepts of mobile prosthesis
General concepts of mobile prosthesis on implants
General concepts of Removable Partial Prosthesis (resin and metal)

Prerequisites

The student must have taken Dental Materials

Teaching form

The entire course will be delivered with 4 hours of didactic teaching and 4 hours of interactive teaching

Textbook and teaching resource

Slide of the lesson

Semester

2nd year - second semester
