COURSE SYLLABUS

Oral Hygiene Training for Hemathooncologic Children

2425-2-I0301D027

Aims

The course will address the issues of the teacher / student relationship related to class management and all relational, affective, cognitive, social and cultural aspects (and their reciprocal interrelations) that characterize class life with particular reference to secondary school.

Contents

Paradigms and operational tools related to observation techniques will be presented to understand the characteristics of the school context, of the subjects and of the relationships, as well as of the didactic action.

Detailed program

The themes of the class group, the personal and context variables that intervene in the educational relationship, individual and group work, relationships with colleagues and families will be addressed. Finally, the specific characteristics and problems of the school system will be taken into consideration, with particular reference to lower and upper secondary schools.
