COURSE SYLLABUS

Introduction To The Training 4

2425-2-I0101D903-I0101D910M

Aims

In preparation for the clinical internship, the student must learn and use the concepts of nursing and deontological principles, in the care situations provided by the educational project and, Consequently, to act in relation to the responsibilities required by the educational level; to recognize and respect the role and competences of the members of the welfare team, establishing relationships, participating in activities and making constructive contributions. It will also be able to identify nursing diagnoses, through the initial and continuous evaluation, to implement nursing interventions to the person in the different stages of life, both in hospital and in the communities, in compliance with ethical principles

Contents

During the internship will be tested, within the socio-sanitary structures, the contents presented within the courses of the first course with particular reference to the conceptual model in use in the individual sections of the course. Among the aims of the clinical internship is to learn and develop PROFESSIONAL SKILLS divided into six areas: Culture, ethics and values; Health promotion and prevention, guidance and education; Decision making; Communication and teamwork; Research, development and leadership; Nursing.

Detailed program

In preparation for the internship the student will deepen the contents:

- Management of the SNG
- Management of surgical drainage
