SYLLABUS DEL CORSO

Oltre la Malattia Ematologica: il Paziente e le Sue Fragilità

2425-2-I0101D918

Aims

The course aims to provide the student nurse specific knowledge on the care of patients suffering from onco-haematological diseases, starting from a deepening of the clinic, analyzing therapeutic procedures such as chemotherapy and stem cell transplantation, to deepen the relational aspects

Contents

Clinical approach to the haematological patient based on an analysis of the organizational context.
Approach to the particular fragility of the haematological patient.
Study of the main haematological pathologies

Detailed program

Importance of diagnostic and therapeutic procedures for diagnosis (Bone Marrow Aspiration; Bone Biopsy; Medicated Rachicentesis; Therapeutic apheresis)
Bone marrow transplantation (allogeneic and autologous);
Communication and relationship with the outside and family members of the patient; Psychological support to patients, family members and caregivers.
The end-of-life event as outcome or complication of the disease;
Taking charge of the patient after discharge

Prerequisites

Enrolment in the 2nd and 3rd year of the Degree Program in Nursing

Teaching form

The lesson is held in a paying mode in presence through frontal lesson, video projection, discussion and group work
