COURSE SYLLABUS

Legislation and Health Organization

2425-3-I0102D016

Aims

Provide knowledge of health legislation of interest to the midwifery profession, professional liability, bioethical aspects in health care, labour law and business economics.

Describe the complexity of the midwifery profession by placing it in its regulatory, organisational and deontological context.

Contents

The medico-legal activities of the midwife, health protection, professional secrecy, criminal and civil law, the definition and ascertainment of death, health care liability and the protection of maternal and child health.

The employment relationship and the self-employment relationship.

The principles and regulations governing the organisation of health care companies

The main regulations relating to the midwifery profession and the midwife's own field of activity and responsibility.

The ethical, bioethical and deontological issues arising within the midwifery profession, the rights of the assisted person.

Detailed program

The detailed program can be found in the Syllabus of the individual modules that compose the course

Prerequisites

None.

Teaching form

Lectures are conducted mainly in the delivery mode (frontal lecture) with the inclusion of some interactive activities (individual and/or group exercises, guided discussions).

Please refer to the syllabus of teaching modules for detailed description of the teaching mode.

Textbook and teaching resource

The bibliography can be consulted in the Syllabus of the individual modules that compose the course.

The teaching materials (slides, work tracks, scientific articles) will be uploaded on the e-learning pages dedicated to the individual modules.

Semester

II semester.

Assessment method

The final exam aims to assess the acquisition of knowledge and understanding of the program content.

It consists of a written exam followed by an interview.

The written exam consists of closed-ended (true/false, matching, multiple-choice quizzes) and short open-ended questions on the content covered in the following Didactic Units:

- Applied Economics
- Health care legislation and organization
- Labor Law

The oral examination involves the discussion of the written test and an interview on the topics covered in class in the following Didactic Units:

- Forensic Medicine
- Labor Law

For the Didactic Unit Legal Medicine, individual preparation of a technical paper on a medico-legal topic with an obstetrical case is required, which will be presented and discussed during the interview (see specifications on the relevant Syllabus)

For further details, please refer to what is specified in the individual Unit Syllabi and the directions that will be given in class.

Office hours

On appointment.

Sustainable Development Goals

GOOD HEALTH AND WELL-BEING | GENDER EQUALITY | DECENT WORK AND ECONOMIC GROWTH
