SYLLABUS DEL CORSO

Ricerca Ostetrico-Ginecologica e Neonatale

2425-2-I0102D012

Aims

By the end of the course, the student will know:

- how to make a search query and how to find, to understand and to analyze critically scientific literature
- how to collect, to order and to analyze data from professional context.

Contents

The course provides fundamentals of midwifery research process.

It also provides basic knowledges about health data collection and analisys.

Detailed program

The extended programme can be found in the Syllabus of the individual modules that make up the course.

Prerequisites

None

Teaching form

The teaching methodology used in the course can be found in the Syllabus of the individual modules that make up the course.

Textbook and teaching resource

The bibliography can be consulted in the Syllabus of the individual modules that make up the course, and the teaching materials (slides, articles, work tracks, scientific papers) will be uploaded on the e-learning page dedicated to the individual modules.

Semester

II semester

Assessment method

The final exam aims to assess the acquisition of knowledge and understanding of the program content.
It consists of a written exam followed by an interview.
The written exam consists of exercises, closed-ended questions (true/false, matching, multiple-choice quizzes) and short open-ended questions, on the content covered in both Didactic Units.
The oral examination will involve the discussion of the written exam and an interview on the topics covered in lecture in the Obstetrical-Gynecological-Neonatal Research Didactic Unit.
The use of correct terminology will also be considered for evaluation.
