SYLLABUS DEL CORSO

Metodologia Clinica nelle Scienze Ostetrico-Ginecologiche e Neonatali

2425-1-I0102D902

Aims

The course provides the essential elements to apply the Midwifery Management and describe the actions of obstetric, gynecological and neonatal care. It provides students with the scientific-methodological knowledge and technical-professional skills to be applied into care procedures, diagnosis and treatment as part of Obstetric Sciences - Gynecological and Neonatal. Provides the tools for critical ethical and bioethical analysis to be used when faced with ethical dilemmas and conflicts in Midwifery Care

Contents

The Midwifery Management procedures. Basic Midwifery care procedures for Mother and Newborn. Therapeutic Prescription and Therapeutic Administration. Hygiene notion and prevention of infections. The different approaches and models of bioethical reflection. The tools for resolving ethical dilemmas/conflicts. The Deontological Codes of Obstetrics/Organisation (FNOPO and ICM)
